Experience

iCrossing Inc.

UI Designer 9/2022 - Present

- Designed user interfaces for a responsive website, increasing PDP conversion rate by 57% and reducing bounce rate by 11%.
- Built design systems from scratch for various clients by reviewing the existing style guides and producing a component library, resulting in a faster UI design process and more consistent UI designs.
- Created interactive hi-fi prototype for a landing page, improving design approval speed.
- Designed a series of infographics for Microsoft 365 Life Hacks, resulting in a 12% increase in organic search clicks.
- Contributed to design QA by collaborating with the development team, enhancing the end user's experience.
- Created the company's first AR filter through Blender and Unity which was utilized at an internal program.
- Hosted Figma prototyping workshops to elevate the creative team's prototyping skills.
- Shaped iCrossing's branding by winning several design contests, including creating the iCrossing University logo.

Grady Campbell Inc.

Senior Visual Designer 1/2020 - 9/2022

- Led projects from initial concept to final product, and managed a team of designers and developers, completing projects on time and within budget, also meeting or exceeding key stakeholders' expectations.
- Responsible for information architecture, wireframes, interaction and visual design, and prototyping cross-device websites for all stages of the design process.
- Inspired the team to integrate UX practices into the agency's design process.

Visual Designer *10/2016 - 12/2019*

- Designed intuitive interfaces that align with UI/UX design principles.
- Collaborated closely with design director, strategists, developers, and project manager.
- Produced various promotional and interview videos, e-greeting motion graphics, and simple logo animations.
- Designed and developed responsive email campaigns utilizing HTML and CSS.
